

Level-Angle Meter

A80

Features:

- Sturdy aluminum alloy structure, small and durable.
- Measuring the angle and level of objects, mechanisms, settings...etc
- Can be zeroed at any angle and has a built-in calibration function.
- Strong magnetic bottom surface, can be absorbed on any angle metal surface for measurement.
- With tilt direction indication, the indicator automatically flips function.
- Automatic backlight (easy to use in dark places), automatic / manual shutdown function

Applications:

1. Car repair: four-wheel alignment, vehicle equalization
2. Mechanical manufacturing: horizontal and inclination adjustment of machine tool table
3. Construction engineering: equipment elevation angle, road and bridge slope detection ... etc.
4. Communication installation: elevation measurement of base stations, satellites, and television receivers.
5. Home decoration: adjustment of the chainsaw angle and horizontal measurement of the mounting parts.
6. Others: Railways, water conservancy, biology, medicine and industrial automation ... etc.

Specification of A80

Accuracy	0~90° : ±0.1°, the rest : ±0.2°
Resolution	0.05°
Working Range	90° × 4
Display	LCD display with Backlight Function.
Main Function	※ Zeroed at any angle ※ Auto-Backlight ※ Auto / manual power off ※ Built-in calibration ※ Strong magnetic bottom surface ※ With tilt direction indication ※ 90° × 4, Resolution is 0.02°
Power Supply	AAA alkaline battery × 2
Battery Life	Approx. 300hours (continues)
Working Temperature	-5~+45°C (23~113°F)
Working Humidity	≤85%RH
Backlight	The backlight will turn off automatically if there is no key operation or no change in visual value for about 15 seconds. The backlight automatically turns on when there is a key operation or the value changes.
Standard Applications	1. A80 Level-Angle Meter 2. AAA Battery × 2 3. Soft carrying Case (Can be hung on the waist) 4. Instruction manual
